Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1- are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 1, lines 1, 2 and 3 are confusing and indefinite since the same term "component" is used to define plastic, perform and mold part. Appropriate correction is required. Additionally, "component" is used throughout the claims and is unclear as to which component is being referred.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1, 5, 9, 12-18 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by European Patent Application 186015 to Masui et al.

6. The sequence is disclosed on pages 7 and 8 and clearly define the cutting edge 8a and 8b.
7. Claims 1-18 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Masui et al. (Pat. No. 5,238,640).
8. Masui et al. discloses the method claimed including the peripheral edge curved inwardly toward the center and trimming the edge flush with the plastic material on the internal surface of the perform. See col. 8, lines 1-26.
